

The diagram illustrates the components for the 100PCS connector assembly. It includes two boxes at the top: the left box contains a '中心针' (Center Pin) and is labeled '100PCS'; the right box contains a '铜管' (Copper Tube) and is labeled '100PCS'. Below these boxes is a detailed cross-sectional view of the '连接器' (Connector), which is labeled '100PCS'. The connector assembly shows the center pin inserted into the copper tube, with a textured, braided shield surrounding the central conductive path.
